Subject: RE: Public Water System Status map

Hi Jeff,

Here is the information that we prepare daily. It is posted on our website (daily) and can be viewed at the TCEQ's "Hurricane Response" link at <https://www.tceq.texas.gov/response/hurricanes> ; "Current Conditions" section.

Today's list and map set (9/1/17) are attached for reference.

Because we are focused on assessing status/getting systems up and running, we are not collecting estimated funding needs.

Thanks,

Stephanie

Subject: Public Water System Status map

Kelly,

Hope things have settled a little for you. As mentioned at the meeting yesterday, it would be helpful for us and the communities if you could provide us with the spreadsheet that underlies the map that you are producing. If we could see who has been contacted and the status, it could eliminate any additional calls to these entities.

Additionally, we recently learned that we may be called upon to estimate funding needs to the disaster related to DWSRF and CWSRF. So if those estimates are being collected already, that will again save additional efforts by the communities.

Please let me know if you have any questions.
